

JMC 105 Spring 2010
Assignment 1: Folders and relative links

Hello, my name is: _____

Here's a collection of files in folders that represent a sample Web site, myfakesite.com. The folder structure goes from left to right, which means the places folder is inside the myfakesite.com folder, and the files to the right of the places folder are inside the places folder.

Write the correct relative link for each description.

1. Link from photos.html to stapler.jpg
2. Link from index.html to myanimal.jpg
3. Link from nevada.html to index.html
4. Link from photos.html to california.html
5. Link from california.html to blueox1.jpg

Now pretend there's another folder inside myfakesite.com called morestuff, and there are 3 files inside that folder: image1.jpg, image2.jpg, and page100.html.

6. Link from page100.html to photo.jpg
7. Link from page100.html to myanimal.jpg
8. Link from nevada.html to image2.jpg
